

A 49-year old male...

showed a number of classic **magnesium deficiency signs**, but a standard blood test showed his magnesium was **normal**.

His Functional Health Report revealed he needed to maintain a higher dose of magnesium to remain healthy.

He increased his magnesium intake. Within days, his fatigue vanished, the dark circles under his eyes began to fade, his blood pressure lowered, his HDL levels rose, and his blood sugar control improved.

What critical health information are you missing?

Ask your healthcare professional for a Functional Health Report today.

A Functional Health Report takes your lab data and analyzes it to help you understand what's going on inside your body.

Like a finger print, people are individuals with unique biochemical characteristics. Even for people with the same condition, their contributing imbalances may be very different. That's why for optimal results, health decisions should incorporate understandable, actionable information about your biochemistry. That is exactly what The Functional Health Report does, so ask your health care provider for one today.

IMAGINE

if you could ask your body

WHAT'S GOING ON?

JANE DOE
49 year old Female - Born Nov 15, 1968
Lab Test on Apr 01, 2022

Blood Test Results Report

The Blood Test Results Report lists the results of the patient's Chemistry Screen and CBC and shows you whether or not an individual element is outside of the optimal range and/or outside of the clinical lab range. The elements appear in the order in which they appear on the lab test form.

| | | |
|-----------------------------------------------------|-----------------------------------------------------|-------------------------------------------|
| Above Optimal Range 8 Current 13 Previous | Above Standard Range 5 Current 5 Previous | Alarm High 2 Current 1 Previous |
| Below Optimal Range 8 Current 6 Previous | Below Standard Range 0 Current 1 Previous | Alarm Low 0 Current 0 Previous |

| Element | Current | | Previous | | Impr | Optimal Range | Standard Range | Units |
|------------------------|-------------|-------------|-------------|-------------|------|-----------------|-----------------|--------------------------|
| | Jan 24 2021 | Aug 06 2020 | Jan 24 2021 | Aug 06 2020 | | | | |
| Glucose | 83.00 | 90.00 | 83.00 | 90.00 | | 72.00 - 90.00 | 65.00 - 99.00 | mg/dL |
| Hemoglobin A1C | 5.50 | 5.60 | 5.50 | 5.60 | | 5.00 - 5.50 | 0.00 - 5.60 | % |
| BUN | 17.00 | 17.00 | 17.00 | 17.00 | | 10.00 - 16.00 | 7.00 - 25.00 | mg/dL |
| Creatinine | 0.83 | 0.88 | 0.83 | 0.88 | | 0.80 - 1.10 | 0.40 - 1.35 | mg/dL |
| BUN/Creatinine Ratio | 20.48 | 19.31 | 20.48 | 19.31 | | 10.00 - 16.00 | 6.00 - 22.00 | Ratio |
| eGFR Non-Afr. American | 69.00 | 65.00 | 69.00 | 65.00 | | 90.00 - 120.00 | 60.00 - 90.00 | mL/min ^{1.73m2} |
| eGFR African American | 81.00 | 76.00 | 81.00 | 76.00 | | 90.00 - 120.00 | 60.00 - 90.00 | mL/min ^{1.73m2} |
| Sodium | 138.00 | 137.00 | 138.00 | 137.00 | | 135.00 - 142.00 | 135.00 - 148.00 | mEq/L |
| Potassium | 3.90 | 4.20 | 3.90 | 4.20 | | 4.00 - 4.50 | 3.50 - 5.30 | mEq/L |

Have you taken a lab test
in the last 3 months?
Or plan to take one soon?

**Then ask your healthcare
practitioner for a Functional
Health Report today.**

Understand your body.
Spend your healthcare
dollars wisely.

Studies show health issues stem from biochemical imbalances. In fact, each “disease” is really a specific pattern of biochemical imbalances.

Your Functional Health Report works by analyzing results from your lab data. It identifies your body’s unique biochemical patterns and makes specific, scientifically based recommendations. So you:

- Understand your nutritional deficiencies** and which supplements could help you.
- Save time and money** by purchasing only what your body needs.
- Enjoy **peace of mind** that you are not accidentally harming yourself.

Every recommendation is based on your body’s unique biochemistry and sourced from published medical research.

Personalized Information = Better Decisions

You should get a
Functional Health
Report if...

- You want to address an **existing health concern or condition**
- You want to **optimize athletic performance**
- You want to **reduce medications**
- You want to **overcome an addiction**
- You want to **get pregnant**
- You want to **increase vitality**
- You’re at **high risk of disease**
- You simply **want to feel better!**

A Functional Health
Report is like talking directly
to your body.

Your Functional Health Report helps you understand:

Where you are:

Explains what your lab results mean and relates each recommendation back to specific biochemical imbalances.

How you’re doing:

An early warning system identifying imbalances when they are meaningful, not just critical.

Your next steps:

Ranks imbalances so you can focus on what is most important; recommends further testing based on your current lab results; and provides special alerts where your lab results may require special attention.

Your progress:

Tracks results to see how well your treatment is working.

Your personalized Health Improvement Plan:

Identifies your body’s unique biochemical pattern and makes specific, scientifically based recommendations.
